Enquiries may be directed to Joseph Kgatile at 014 590 3259.

MUNICIPAL MANAGER

Ms NQOBILE SITHOLE

Up your skills at
True-Blue Training training centre

Rustenburg – True-Blue Training in Rustenburg was established in 2012 by founder Chris Grobler to provide on-site unit standard training services on earthmoving machinery, lifting machinery and safety training to their valued clients. True-Blue Training obtained accreditation with TETA, CETA, and MerSETA and is presently in the final stages with MSA. They are also registered with the Department of Labour and awaiting registration from the Department of Transport as well as the Department of Higher Education and Training, which is compulsory for all training providers. After doing some market research, they identified the need to invest in a training facility to assist smaller businesses and private individuals; thereby creating an empowered and skilled workforce. The True-Blue Training team take pride in ensuring that their students are practically

competent. Students physically work with the tools to familiarize themselves. Those undergoing scaffolding training have to erect and dismantle it themselves. This includes working at great heights. Personal protective equipment is used with all training sessions.

To ensure that the training you receive is legitimate, ask whether:

- The company, as well as the assessor, is accredited for your training requirements.
- Will the company load me onto the national learner database?
- Will I receive a statement of results?

True-Blue Training has a skilled and professional team that will gladly assist with any enquiries. Their motto is: "Don't blame the worker, train the worker."

For more information contact True-Blue Training on 014-594 2922 or 072-653 3356.
